

# altech super stools

Altech Super Stools are Australia's highest quality work platforms. Our Low, High and Ultra High range offers the widest available choice of heights, and our innovative locking system is unsurpassed for safety.

Unlike those of other manufacturers, our unique spring-loaded locking system locks stool legs in place in both the closed and open position, providing maximum security.

Altech Super Stools are light and tough and feature two handles; one on the side for carrying when folded, and a top handle for easy maneuverability when in use.

Safer to use and offering considerably wider coverage than a stepladder, Altech Super Stools are simpler and more convenient than trestle ladders and a plank. Our variable lengths offer a stool for every exigency, whether it be larger areas or confined spaces, and quick release and set leg clips provide fast height adjustment. They're also ideal when steps are in the way – just fold one side up, and when working on uneven ground – adjust each leg to suit the conditions.

Durable and compact, Altech Super Stools also feature deep 'vee' knurls for secure foothold, superior cast aluminum end caps, dimpled special grade rubber feet for a firm grip, and easy slide telescopic legs, offering height adjustment in 20mm increments.

## Options and Specifications

Low: 425mm–575mm

High: 550mm–800mm

Ultra High: 775mm–1100mm  
(the highest in the Australian market)

Available in lengths from 1.25m to 3.5m

200kg working load limit

Folding and locking system bears Australian Patent No. 2005100826

Exceeds Australian/New Zealand standards AS/NZS 1576.5-1995 Cl. 7

Standard finish for caps and legs is mill finish. Powdercoat finish available by special request. Stool illustrated features powdercoat colour Dulux Safety Yellow.

The twin handles allow the Super Stool to be easily moved when in the upright position, and easily carried when in the folded position.

Deep 'vee' knurls for secure foot hold

Legs lock into place in both the extended and folded positions so there's no risk of collapse while standing on the stool, nor of the legs swinging out when carrying the stool.

New Release! Altech Super Stools-Double are available now, providing added safety with a 450mm wide double-width work platform, in a full range of lengths and heights and with the same superior features. Ask for more details.

Superior cast aluminium end caps are tough and durable, and as a theft deterrent, can be stamped with the owner's name and phone number

Quick release and set leg clips provide fast height adjustment

Easy slide telescopic legs adjustable in 20mm increments

Dimpled special grade rubber feet for a firm grip

# altech super stools double

Altech Super Stools - Double, with their double-width platform and their innovative leg locking system, are the safest work platforms available on the Australian market. These stools offer the widest available choice of heights, in a Low, High and Ultra High range.

Altech Super Stools - Double have all the benefits of a Super Stool, as well as the added advantage of a wider and safer platform.

Unlike those of other manufacturers, our unique spring-loaded locking system locks stool legs in place in both the closed and open position, providing maximum security.

Altech Super Stools - Double are light and tough and feature two handles; one on the side for carrying when folded, and a top handle for easy maneuverability when in use.

Safer to use and offering considerably wider coverage than a stepladder, Altech Super Stools - Double are simpler and more convenient than trestle ladders and a plank.
