and easy  
as climbing stairs?**

**The Little Jumbo  
safety step!**

# Little Jumbo is in a class of its own.

In the age of planned obsolescence and short-term thinking, Little Jumbo is in a class of its own. Every Little Jumbo is designed and built to remain safe and useful long after lesser ladders have been discarded.

When compared to other ladders the engineering genius of the Little Jumbo really stands out. Safe, extra large steps,

instead of narrow rungs combined with the stable Little Jumbo framework make it a pleasure to stand and work on.

When the job at hand is complete the Little Jumbo can be stored flat and thin... easy to carry... easy to store.

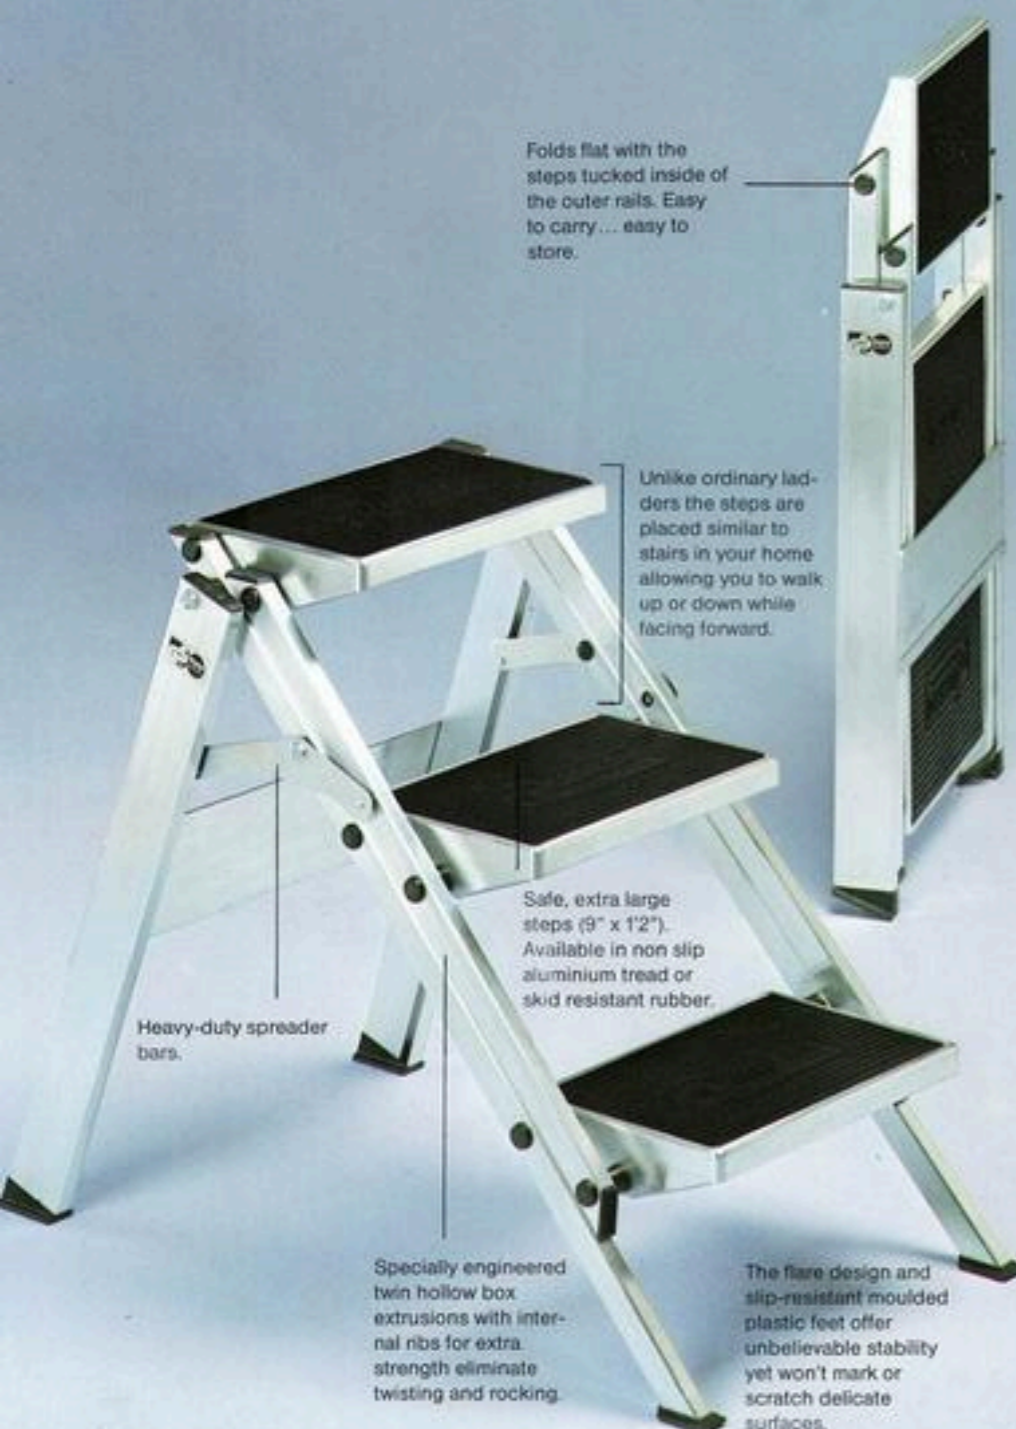

The Little Jumbo is like no other ladder because it is engineered like no other ladder.

## Ideal for big jobs...

To allow the use of both hands while working on a ladder requires a safe place to stand. Little Jumbo's large safe steps are ideal for safe standing when working with heavy tools.

With both feet planted securely on one step you can safely reach in any direction. In the storage position the Little Jumbo is flat, thin and easy to transport.
