Australian **Made**

StockMaster NavigatorPRO is an Auto-Safe and easy to use mobile platform ladder.

StockMaster NavigatorPRO features a Move, Steer and Brake control which keeps all four feet firmly on the ground unless you're moving it.

Taking hold of the control raises NavigatorPRO to the mobile position and provides easy positive steering. Release the control and NavigatorPRO brakes automatically and is stable. The design of NavigatorPRO removes all skating and lack of stability seen in other ladders that use springs or foot pedals. NavigatorPRO remains rock steady with zero movement as you work around the platform.

One control does it all creating a much safer product.

The Move, Steer and Brake control positions you away from the front of the ladder. This allows a normal walking step and the ladder moves quickly and easily with little effort. NavigatorPRO moves to a new position in half the time of competing products. NavigatorPRO is easier and faster to move around and saves time and equipment.

StockMaster NavigatorPRO features a Safety Rail system that can be adjusted to suit your job, providing improved ergonomics and easy access for stock picking and many other tasks, and with NavigatorPRO you are protected against accidentally stepping off the front of the platform.

Featuring the unique and fully automatic StockMaster Auto-Gate, NavigatorPRO frees your hands to carry an item and still maintain a safe grip as you leave or enter the workspace.

StockMaster NavigatorPRO Platform Ladders are . . .

- ✓ Auto-Safe
- ✓ Easier and faster to move around
- ✓ Complete with a safety railing system that can be adjusted to suit the job
- ✓ Equipped with an automatic closing gate at the platform entry
